Portfolio Positions 3 Open orders 1 Instrument Execution Trade history Funding Finance Stats Account Log

Premium index: the book's mid against the engine's mid, sampled every minute, averaged over the hour, plus a small interest term, clamped at ±0.05% an hour. Longs pay when the book trades above the engine's price, shorts pay when below. Now on HG-USD: +0.0050% / 8h from a premium of +0.00 bps (0 samples). Your net: \$-0.00

Nothing charged yet. Funding lands every hour a position is open, and the rate above says which side is crowded.

Buy · Long HG

published as a price, not a book · nothing to size here

HG-USD is published as a price, not a book. One source quotes it, so there is nothing for the engine to cross-check and nothing to lend against. Read it here; the books you can trade have two sources or more.
